## Why Use Cardboard?

**We can all agree that reducing our reliance on plastic is crucial. Its devastating impact on our planet - particularly our oceans - is undeniable.**

At Sweetlove, we've dedicated four years to the development and meticulous testing of our innovative cardboard vending pots. Designed to fit both traditional sweet machines and Pringle-sized dispensers, these pots combine functionality with environmental responsibility, aligning with our commitment to a greener future.

Our cardboard pots offer a significant step forward in sustainability. Made from fully compostable materials, they provide an eco-friendly alternative to single-use plastic, which often contributes to pollution and harm to marine life. These pots are suitable for composting in both home and commercial facilities, ensuring ease of disposal and reducing waste.

## Reap the Benefits of Cardboard

The rigorous testing process involved fine-tuning every aspect of the pots to guarantee durability and efficiency. They not only maintain the integrity of the contents but also work seamlessly with existing vending systems, making the transition to eco-friendly packaging effortless for operators.

With mass production now underway, Sweetlove is proud to lead the way in revolutionizing vending packaging. Our cardboard pots are more than a product—they're part of a movement towards reducing plastic use and embracing materials that are kind to the planet.

# Get More for Your Vending

**Thank you for purchasing from us you will find your vendor labels and invoice at the back of this booklet.**

As the founder of Sweetlove I am committed to contributing to the reduction of the environmental impact of food packaging waste. I have developed a new pot that is much safer for the planet by reducing ocean bound plastic resulting in cleaner seas.

Made from sustainably sourced compostable cardboard the new pot fits all sweet vending machines and is the perfect environmentally friendly replacement for plastic which is disposable in home and commercial composting facilities.

There is also a Pringles sized pot that increases the range that can be sold in these machines with much better returns for operators. I have developed the range to include both mechanical and electronic machines.

Should you have any questions feel free to contact me meanwhile, have a good look through this booklet.

# Welcome to the Future

When you choose Sweetlove, you're not just selecting a product - you're making a commitment to the planet.

Rest assured, when our pots are disposed of responsibly and sent to composting, they have no negative impact on the oceans or the environment.

By choosing sustainable solutions, you play an active role in preserving the planet for future generations.

We take pride in being the only manufacturer and supplier of truly safe pots. Our innovative and eco-conscious approach ensures that every pot we produce contributes to a cleaner, greener world.

## Go ahead - make a difference that matters.

Choosing Sweetlove products not only helps you save money and increase your profits, but it also means taking a meaningful step toward protecting our planet. By reducing plastic use, you're actively preventing harmful waste from damaging the environment and contributing the preservation of our oceans.

Our pots, lids, and inner bags are crafted with sustainability in mind. They are 100% compostable, whether in home composting setups or commercial facilities, ensuring a cleaner, greener future for everyone.

## Material Accreditation

**BOARD or CORE:** Manufactured by Sonoco Products Company, 1 North Second Street, Hartsville, South Carolina, United States. FSC Recycled, FSC Mix cert code: SCS-COC-79388, Trademark licence code: FSC-C011144 Valid from: 15/07/ 23 to 14/07/28.

**ADHESIVE:** Exoflex 2509 Manufactured by EOC UK, Tenax Road, Trafford Park, M17 1JT, UK. Industrial use.

**TALLOW:** WHC010 023. Manufactured by: William Hodgson & Co, Gawsworth Business Court, Shellow Lane, North Rode Congleton, Cheshire, CW12 2FQ

**CELLULOSE BAG:** Manufactured in the UK from NatureFlex™, a compostable and biodegradable cellulose which is derived from renewable wood pulp, making them ideal as a more eco-friendly packaging.

**LID AND BASE:** Manufactured in Sweden Invercote is designed for prestige packaging applications and is suitable for aroma and flavour sensitive products as well. Invercote is certified as industrially biodegradable and compostable in compliance with the demands in the Directive EN 13432:2000.

## IT ALL STARTS WITH WHATS INSIDE...

With over twelve years of experience in the vending business, we've operated enough machines to truly understand what customers want and what sells best.

Our pots are filled to offer unbeatable value, packed with the finest quality sweets we can source. We pride ourselves on offering a diverse selection, ensuring there's something to delight every sweet tooth.

Our range features sweets from across the globe. Can you guess where they all come from? Go ahead, give it a try - we bet you can't!

## CARDBOARD POTS

We are proud to be the only supplier of plastic-free vending pots designed specifically for vending machines.

Every element of our packaging - pots, lids, inner bags, and even labels - is responsibly sourced and 100% compostable. Our materials break down entirely into natural soil components, leaving no harmful trace.

With Sweetlove, you can be confident that nothing you sell will contribute to ocean pollution or environmental damage. Together, we can create a cleaner, more sustainable future.
